SYSTEMS SPECIALIST- ENGINEERING

Sani Marc Group, Food & Beverage Division

Tasks

Under the supervision of the systems specialist responsible for CIP projects, the Systems Specialist- Engineering performs all of the following tasks:

Management and organization

Evaluates and plans activities related to the sales of equipment, products and services in order to support the Food & Beverage sales team's efforts to optimize efficiency for customers, such as:

- Preparing sales presentations for equipment, products and services with respect to dosages and applications of cleaning and sanitizing products
- Preparing training to facilitate the sales of equipment, products and services
- Assisting account and sales managers during customer meetings
- Assisting account and sales managers in evaluating customer needs
- Determining the feasibility of requests
- Researching equipment for specific applications
- Evaluating the development cost of systems and sharing the results with the sales team
- Planning and carrying out dosing system and product application projects
- Actively participating in R&D projects in conjunction with the laboratory

Customer support

Ensures the company has the necessary expertise to effectively support the sales of equipment, products and services, such as:

- Sharing information on cleaning systems equipment with the engineering department
- Evaluating equipment and products
- Participating in technical updates of equipment
- Responding to technical requests from customers and the sales team

Requirements

- College diploma in the food & beverage sector or process engineering, or other relevant experience
- Knowledge of fluid mechanics, pumps and valves
- Knowledge of equipment commonly used in the industry (CIP, dilution systems, etc.)
- Knowledge of membrane systems and cleaning operations (asset)
- Perfect spoken and written English
- Available to travel across Canada

Working Conditions

- Branch: Brossard
- Permanent position; eligibility to the Company's group insurance plan after three (3) months of service and to the pension plan after one (1) year of continuous service.
